

BLACKROCK

INVESTOR PROFILE

Suited to investors seeking capital growth over the long term and diversification throughout world markets. Investors should be able to accept a moderate level of risk.

INVESTMENT OBJECTIVE

To achieve long term growth by investing in a diversified portfolio of equities located throughout the world and primarily outside of Canada.

INVESTMENT STRATEGY

The fund intends to achieve its objective by replicating the holdings and returns of the MSCI All Country World excluding Canada Index. This index captures small, mid, and large capitalization representation across 22 of 23 developed markets (excluding Canada) and 27 emerging markets. In total, the index covers approximately 99% of the global equity opportunity set outside Canada. In order to track the performance of the index, the underlying fund manager attempts to invest in all of the stocks that make up the index in the same relative weights as they are within the index. Small amounts of cash and/or money market securities (generally less than 1%) may be held for liquidity or pending investment.
