

## PH&N Investment Services®

### INVESTOR PROFILE

Suited to investors seeking income and growth provided by capital appreciation of Canadian equities and with a medium to long-term investment horizon. Investors should be able to accept a moderate level of risk.

### INVESTMENT OBJECTIVE

To provide long-term capital growth and income by investing primarily in a well-diversified portfolio of dividend income-producing Canadian securities that have a relatively high yield.

### INVESTMENT STRATEGY

The fund intends to achieve its objective by investing primarily in Canadian common shares that pay dividends or have prospects of paying or growing their dividends and, to a lesser extent, preferred shares and bonds. Because of its focus on dividend-paying securities, the fund will typically be invested in relatively mature, yet growing businesses, and as such will not have exposure to early stage growth companies, companies which require high levels of capital expenditures, or companies with high rates of internal reinvestment. As a result, the fund will typically be under-represented in the small capitalization, resource, technology, and communications sectors as compared to broader equity market indices.

Environmental, social, and governance (ESG) factors are considered where material to investment decisions.
